Average Price

Per-unit transaction value

Key Takeaways for Leadership

Strong Market Performance

769M in total sales demonstrates robust demand across mobile product lines with healthy transaction volumes.

Premium Product Mix

40K average price indicates successful positioning in mid-to-premium segments, driving revenue growth.

Balanced Payment Adoption

Even distribution across payment methods (UPI, cards, cash) shows strong customer flexibility and channel optimization.

Positive Customer Sentiment

2.33K good ratings versus 0.85K bad ratings reflects strong product satisfaction and service quality.

Sales & Product Performance Insights

Top Mobile Models

Weekly Sales Pattern

Sales remain consistent throughout the week with slight variations:

- **Peak days:** Monday-Wednesday (26M+ daily)
- **Mid-week:** Thursday-Friday (23.8M-23.9M)
- **Weekend:** Saturday-Sunday (23.3M-23.7M)

Minimal weekend drop suggests strong online presence complementing retail.

Business Insights

Premium Brand Leadership

iPhone SE leads with 60M, showing Apple's continued dominance. OnePlus and Samsung compete closely at 58M and 56M respectively.

Geographic Distribution

Sales spread across major Indian cities indicates successful multi-market penetration and distribution network strength.

Consistent Demand

Stable daily sales (23M-26M range) throughout the week demonstrates predictable demand patterns and effective inventory management.

Time Intelligence & Growth Trends

Month-to-Date Performance

MTD sales reached **262M** with steady daily growth acceleration. The trend shows consistent upward momentum from Day 1 (0.7M) to Day 16 (20.6M), indicating strong month progression.

Quarterly Performance 2022

- **Q1:** 67M – Strong start to the year
- **Q2:** 64M – Slight dip, seasonal adjustment
- **Q3:** 67M – Recovery to Q1 levels
- **Q4:** 65M – Stable year-end performance

SPLY
Same period last year

☐ **Year-over-Year Growth:** Significant improvement compared to same period last year (59M), demonstrating strong business expansion and market share gains.

Monthly Sales Distribution

Seasonality Insight: March and May show peak months (25M, 23M), while April and August dip to 19M. This pattern suggests opportunities for targeted promotions during slower months to smooth revenue curves.

Customer Behavior & Business Strategy

Customer Ratings Distribution

61% positive ratings indicate strong customer satisfaction, though 22% negative ratings require attention.

Payment Method Preferences

Balanced distribution across all methods shows excellent payment infrastructure and customer choice.

Strategic Recommendations

01

Revenue Optimization

Focus marketing efforts on March and May peaks. Launch promotional campaigns in April and August to boost slower months and smooth quarterly revenue.

02

Customer Satisfaction Enhancement

Address the 22% negative ratings through improved after-sales service, faster resolution times, and proactive customer outreach programs.

03

Digital Payment Incentives

While UPI adoption is strong (24%), offer cashback and rewards to increase digital payment share further, reducing cash handling costs.

04

Product Portfolio Balance

Maintain competitive pricing across iPhone, OnePlus, and Samsung models. Introduce mid-range alternatives to capture broader market segments.

05

Geographic Expansion

Leverage strong city-wise performance data to identify underserved markets. Replicate successful strategies from top-performing cities to emerging markets.
